Global Secure Systems Awarded Royal Warrant

Security Practice of MTI Recognised for Data Security Services and Products

Godalming, UK, 16th January 2012; Global Secure Systems (GSS), the security practice of MTI, is delighted to have been granted a Royal Warrant as provider of data security services and products to Her Majesty The Queen. The Royal Warrant was granted from 1st January 2012.

GSS is the security practice of MTI, and is one of the UK's most experienced IT security organisations. Its award-winning IT security services have been helping businesses secure their data and achieve regulatory compliance since the mid-nineties by providing cutting-edge [IT Security Solutions](#) alongside accredited [IT Security Consultancy](#) and [Network Penetration Testing](#) services.

The company, head-quartered in Godalming, Surrey, protects a wide range of clients including major financial institutions, NHS Trusts, local and central government bodies and organisations operating in the education, travel, retail and manufacturing sectors.

David Hobson of GSS said: "The granting of Her Majesty's Royal Warrant is a great honour for GSS and a compliment to the high quality of our services and products. It is a strong endorsement of all the work done for the Royal Household over many years by all the GSS staff."

Keith Clark, President and CEO of MTI added: "The MTI Group is very proud of the contribution and expertise GSS brings to MTI and I congratulate the team on this most prestigious honour."

About MTI

MTI is a leading provider of data centre storage and virtualisation solutions – servicing both public and private cloud environments. With offices in the UK, Germany and France it services over 3000 customers across the world. For over 20 years, MTI has employed a strategic, consultative and customer focused approach, designed to deliver competitive advantages and operational efficiencies for its customers.

MTI acquired GSS in July 2011, integrating the company's top-level data security services into its portfolio of data management and storage solutions. MTI advises its customers on their data storage, and provides best-of-breed solutions that are always available whether in a public or private cloud.
