

MTI Technology CMO re-elected as director on the SNIA Europe board of directors

GODALMING, SURREY, UK, 6th September 2009 — MTI, the leading international provider of consulting services and comprehensive information infrastructure solutions for mid- to large-size organisations, today announced that Aad Dekkers, Chief Marketing Officer, has been re-elected as Director for the Storage Networking Industry Association's (SNIA) Europe Board of Directors for a consecutive term. Dekkers and MTI's continued involvement within SNIA Europe demonstrates the ongoing commitment both organizations have for the promotion of data storage, infrastructure and data centre management. Dekker's election was effective October 7, 2009.

"I am proud to be on the board again after the re-election, I will continue to represent the channel from a System Integrator perspective focussing on storage, networking and virtualisation in the data centre."

SNIA Europe's mission is to promote the acceptance, deployment and confidence in open storage-related architectures, systems, services and technologies, across the IT and business community.

This is being achieved by a coordinated series of activities at both a pan-European level and at an individual country level where SNIA Europe delivers education and information to both the vendor and user communities as a whole and provides a central voice of authority and knowledge for industry commentators (such as press and analysts) and potential users.

SNIA Europe is an active association of vendors and channel partners who share a common interest in promoting the use of networked storage (and other associated aspects of information storage) within the IT community in Europe. SNIA Europe is vendor-neutral and works with both the channel and end users of storage technologies and solutions.

About MTI

MTI is a leading international provider of consulting services and comprehensive information infrastructure solutions for mid to large-size organisations. With more than 20 years' expertise as a storage technology innovator, MTI is uniquely qualified to assess, design, implement and support all data centre initiatives. Today MTI enjoys strategic partnerships with industry leaders including VMware, Cisco and EMC and offers the best data centre and cloud computing solutions and services available today. By employing a strategic, consultative approach, MTI provides customers with a single point of contact that eliminates complexities while delivering operational efficiencies and competitive advantages.
